

Funds from the nation's single largest lender to agriculture.

It's simple. You need money to run a farming business. It has to be available when you want it. It has to offer a good interest rate. It has to be flexible to your operation.

You will find all this, and a lot more, at Farm Credit Services of Mid-America! Whatever type of farming you do, we have loans, leases and financial services to help. We're combining more services than ever before (like the convenience of making internet transactions) to bring 24-hour response to your door. A farming operation doesn't just run 8 a.m.–5 p.m. Neither do we.

At FCS you will find:

Competitive rates – The fact is, today's farmer needs money at the most competitive interest rate possible.

Price is important and we aim to provide credit at the lowest cost possible. On a cost of delivery per dollar of credit, FCS ranks among the very lowest-cost providers in the nation. That means savings to you.

Product selection – LIBOR-indexed. Prime-indexed. Variable or fixed-rate funds can be used to set up your loan. You select between savings and security. FCS always provides an array of loan options that let you select the best product for the best time.

Convenience – If your borrowing need is \$10,000 or over \$1 million, we'll process the application promptly and give you answers fast. Once your loan is established, you can tap into services like our convenient Credit Line drafts, or our many Internet banking capabilities which allow you to move funds, pay bills, or draw on your loan for whatever need arises.

Competent professionals – Your account is serviced by committed specialists. Our Financial Services Officers grew up on farms and are well-trained in both agriculture and finance. They understand your business.
